CONTENTS OF VOLUME 97

NUMBER 1, 5 SEPTEMBER 1975

IOOS, C., OFFER, G., STARR, R. and BENNETT, P., Interaction of C-Protein with Myosin, Myosin Rod and Light Meromyosin 1

RIDGES, S. H. and FLEISCHMAN, J. B., The Structure of an Immunoglobulin Light Chain Fragment in Mouse Myeloma Cells 11

CHÄFER, R. and FRANKLIN, R. M., Structure and Synthesis of a Lipid-containing Bacteriophage. XIX. Reconstitution of Bacteriophage PM2 *in vitro* 21

EVITZKI, A., SEVILIA, N., ATLAS, D. and STEER, M. L., Ligand Specificity and Characteristics of the β-Adrenergic Receptor in Turkey Erythrocyte Plasma Membranes 35

Appendix—LEVITZKI, A., The Quantitative Aspects of Drug–Receptor Interactions 46

HOTHIA, C. and LEUZINGER, W., Acetylcholinesterase: The Structure of Crystals of a Globular Form from Electric Eel 55

ENNIS, P. P. and NOMURA, M., Regulation of the Expression of Ribosomal Protein Genes in *Escherichia coli* 61

HIKAWA-RYO, H. and KONDO, S., Indirect Mutagenesis in Phage Lambda by Ultraviolet Preirradiation of Host Bacteria 77

EARSE, B. M. F., Coated Vesicles from Pig Brain: Purification and Biochemical Characterization 93

ANE, H. E. D. and DENHARDT, D. T., The *rep* Mutation. IV. Slower Movement of Replication Forks in *Escherichia coli rep* Strains 99

ETTERS TO THE EDITOR

LAI, C.-J. and NATHANS, D., Non-specific Termination of Simian Virus 40 DNA Replication 113

RAO, P. B. and BRYAN, W. P., Measurement of Strongly Held Water of Lysozyme 119

WILSON, G. A. and YOUNG, F. E., Isolation of a Sequence-specific Endonuclease (*Bam*I) from *Bacillus amyloliquefaciens* H 123

JOSEPHS, R., An Analysis of the Mechanism of Crystallization of Glutamic Dehydrogenase 127

ANNOUNCEMENT 131

NUMBER 2, 15 SEPTEMBER 1975

KRUGH, T. R. and REINHARDT, C. G., Evidence for Sequence Preferences in the Intercalative Binding of Ethidium Bromide to Dinucleoside Monophosphates 133

JACK, A., HARRISON, S. C. and CROWTHER, R. A., Structure of Tomato Bushy Stunt Virus. II. Comparison of Results Obtained by Electron Microscopy and X-ray Diffraction 163

HARRISON, S. C. and JACK, A., Structure of Tomato Bushy Stunt Virus. III. Three-dimensional X-ray Diffraction Analysis at 16 Å Resolution . 173

PEARCE, T. C., ROWE, A. J. and TURNOCK, G., Determination of the Molecular Weights of RNAs by Low-speed Sedimentation Equilibrium: 16 S Ribosomal RNA as a Model Compound 193

Appendix: ROWE, A. J., Determination of Absolute Fringe Number in Low-speed Equilibrium Experiments by a Modified Fringe Relaxation Procedure 202

ASWAD, D. W. and KOSHLAND, D. E., Jr, Evidence for an *S*-adenosylmethionine Requirement in the Chemotactic Behavior of *Salmonella typhimurium* . 207

ASWAD, D. W. and KOSHLAND, D. E., Jr, Isolation, Characterization and Complementation of *Salmonella typhimurium* Chemotaxis Mutants . . 225

FERMI, G., Three-dimensional Fourier Synthesis of Human Deoxyhaemoglobin at 2·5 Å Resolution: Refinement of the Atomic Model 237

LETTERS TO THE EDITOR

KIRKWOOD, T. B. L. and HOLLIDAY, R., The Stability of the Translation Apparatus 257

DATTAGUPTA, J. K., FUJIWARA, T., GRISHIN, E. V., LINDNER, K., MANOR, P. C., PIENIAZEK, N. J., SAENGER, W. and SUCK, D., Crystallization of the Fungal Enzyme Proteinase K and Amino Acid Composition . 267

ENOKI, Y., TOMITA, S., OCHIAI, T. and IKAWA, Y., Increased Resistance of Mercury-coupled Hemoglobins to Alkali. 273

NUMBER 3, 25 SEPTEMBER 1975

PRIVALOV, P. L., FILIMONOV, V. V., VENKSTERN, T. V. and BAYEV, A. A., A Calorimetric Investigation of $tRNA_1^{Val}$ Melting 279

LAZZARINI, R. A., WEBER, G. H., JOHNSON, L. D. and STAMMINGER, G. M., Covalently Linked Message and Anti-message (Genomic) RNA from a Defective Vesicular Stomatitis Virus Particle 289

LAZDUNSKI, C. J., PAGES, J.-M. and LOUVARD, D., Antibodies as Probes for Detection of Conformational Changes in Proteins. A Model Study with the Alkaline Phosphatase of *Escherichia coli* 309

KLOOTWIJK, J., KLEIN, I. and GRIVELL, L. A., Minimal Post-transcriptional Modification of Yeast Mitochondrial Ribosomal RNA 337

HSU, L.-S. and NEET, K. E., Subunit Interactions of Rabbit Muscle Aldolase. Conformational Change of Aldolase in Magnesium Chloride and its Relationship to the Dissociation of Subunits 351

SAMBROOK, J., WILLIAMS, J., SHARP, P. A. and GRODZICKER, T., Physical Mapping of Temperature-sensitive Mutations of Adenoviruses. . . . 369

LETTERS TO THE EDITOR

WELLS, B. D., Circular Dichroism Estimate of Secondary Structure of Glutamate Dehydrogenase 391

PASEK, M., KEITH, C., FELDMAN, D. and SIGLER, P. B., Characterization of Crystals of Two Venom Phospholipases A_2 395

ANNOUNCEMENT 399

NUMBER 4, 5 OCTOBER 1975

CLEGG, J. C. S. and KENNEDY, S. I. T., Initiation of Synthesis of the Structural Proteins of Semliki Forest Virus 401

HUNT, R. C. and BROWN, J. C., Identification of a High Molecular Weight Trans-membrane Protein in Mouse L Cells 413

HUANG, K.-H. and CANTOR, C. R., Studies of 30 S *Escherichia coli* Ribosome Reassembly Using Individual Proteins Labeled with an Environmentally Sensitive Fluorescent Probe 423

HUANG, K.-H., FAIRCLOUGH, R. H. and CANTOR, C. R., Singlet Energy Transfer Studies of the Arrangement of Proteins in the 30 S *Escherichia coli* Ribosome 443

SOMMER, A. and TRAUT, R. R., Identification by Diagonal Gel Electrophoresis of Nine Neighboring Protein Pairs in the *Escherichia coli* 30 S Ribosome Crosslinked with Methyl-4-mercaptobutyrimidate 471

HERZFELD, J. and SCHLESINGER, P. A., Analysis of the Allosteric Basis for Positive and Negative Co-operativity and Half-of-the-Sites Reactivity in Yeast and Rabbit Muscle Glyceraldehyde 3-phosphate Dehydrogenase . 483

KARPEL, R. L., MILLER, N. S., LESK, A. M. and FRESCO, J. R. Stabilization of the Native Tertiary Structure of Yeast $tRNA_3^{Leu}$ by Cationic Metal Complexes 519

KRAISELBURD, E., GAGE, L. P. and WEISSBACH, A., Presence of a Herpes Simplex Virus DNA Fragment in an L Cell Clone Obtained After Infection with Irradiated Herpes Simplex Virus 1 533

GREENSTEIN, M. and SKALKA, A., Replication of Bacteriophage Lambda DNA: *In vivo* Studies of the Interaction Between the Viral *Gamma* Protein and the Host *recBC* DNAase 543

KLECKNER, N., CHAN, R. K., TYE, B.-K. and BOTSTEIN, D., Mutagenesis by Insertion of a Drug-resistance Element Carrying an Inverted Repetition . 561

SPRINGGATE, C. F. and LOEB, L. A., On the Fidelity of Transcription by *Escherichia coli* Ribonucleic Acid Polymerase 577

GODDARD, J. M. and CUMMINGS, D. J., Structure and Replication of Mitochondrial DNA from *Paramecium aurelia* 593

OLSON, M. O. J., EZRAILSON, E. G., GUETZOW, K. and BUSCH, H., Localization and Phosphorylation of Nuclear, Nucleolar and Extranucleolar Non-histone Proteins of Novikoff Hepatoma Ascites Cells 611

NAKAMURA, Y. and YURA, T., Evidence for a Positive Regulation of RNA Polymerase Synthesis in *Escherichia coli* 621

BEDDELL, C. R., BLAKE, C. C. F. and OATLEY, S. J., An X-ray Study of the Structure and Binding Properties of Iodine-inactivated Lysozyme . . 643

LETTERS TO THE EDITOR

ISHII, T. and YANAGIDA, M., Molecular Organization of the Shell of the T_{even} Bacteriophage Head 655

MOFFAT, K., FULLMER, C. S. and WASSERMAN, R. H., Preliminary Crystallographic Data for a Calcium Binding Protein from Bovine Intestine . 661

BLUNDELL, T. L., BRUNORI, M., CURTI, B., BOLOGNESI, M., CODA, A., FUMAGALLI, M. and UNGARETTI, L., Crystallization and Preliminary X-ray Diffraction Studies on Met-myoglobin from *Aplysia limacina* . 665

PAULUS, H. and DERIEL, J. K., Absence of Kinetic Negative Co-operativity in the Allosteric Model of Monod, Wyman and Changeux . . 667

Index to Volume 97

Acetylcholinesterase: the structure of crystals of a globular form from electric eel, 55
S-Adenosylmethionine requirement in the chemotactic behavior of *Salmonella typhimurium*, 207
Adenoviruses, physical mapping of temperature-sensitive mutations, 369
Aldolase, rabbit muscle, conformational change in magnesium chloride and its relationship to the dissociation of subunits, 351
Alkaline phosphatase of *Escherichia coli* used in model study of the use of antibodies as probes for detection of conformational changes in proteins, 309
Allosteric basis for positive and negative co-operativity and half-of-the-sites reactivity in yeast and rabbit muscle glyceraldehyde 3-phosphate dehydrogenase, 483
— model of Monod, Wyman and Changeux, absence of kinetic negative co-operativity, 667
Amino acid composition and crystallization of the fungal enzyme proteinase K, 267
Antibodies as probes for detection of conformational changes in proteins. A model study with the alkaline phosphatase of *Escherichia coli*, 309
Aplysia limacina met-myoglobin, crystallization and preliminary X-ray diffraction studies, 665
ASWAD, D. W. & KOSHLAND, D. E., Jr, Evidence for an *S*-adenosylmethionine requirement in the chemotactic behavior of *Salmonella typhimurium*, 207
— —, Isolation, characterization and complementation of *Salmonella typhimurium* chemotaxis mutants, 225
ATLAS, D. (see also LEVITZKI, A.), 35

Bacillus amyloliquefaciens H, isolation of a sequence-specific endonuclease (*Bam*I), 123
Bacteriophage λ DNA replication: *in vivo* studies of the interaction between the viral *gamma* protein and the host *recBC* DNAase, 543
— —, indirect mutagenesis by ultraviolet preirradiation of host bacteria, 77
— PM2, reconstitution *in vitro*, 21
Bacteriophage T_{even}, molecular organization of the shell of the head, 655
*Bam*I, a sequence-specific endonuclease isolated from *Bacillus amyloliquefaciens* H, 123
BAYEV, A. A. (see also PRIVALOV, P. L.), 279
BEDDELL, C. R., BLAKE, C. C. F. & DATLEY, S. J., An X-ray study of the structure and binding properties of iodine-inactivated lysosyme, 643
BENNETT, P. (see also MOOS, C.), 1
Beta-adrenergic receptor in turkey erythrocyte plasma membranes, ligand specificity and characteristics, 35
Binding, intercalative, of ethidium bromide to dinucleoside monophosphates, evidence for sequence preferences, 133
— properties and structure of iodine-inactivated lysozyme, an X-ray study, 643
BLAKE, C. C. F. (see also BEDDELL, C. R.), 643
BLUNDELL, T. L., BRUNORI, M., CURTI, B., BOLOGNESI, M., CODA, A., FUMAGALLI, M. & UNGARETTI, L., Crystallization and preliminary X-ray diffraction studies on met-myoglobin from *Aplysia limacina*, 665
BOLOGNESI, M. (see also BLUNDELL, T. L.), 665
BOTSTEIN, D. (see also KLECKNER, N.), 561
Bovine intestine, preliminary crystallographic data for a calcium-binding protein, 661
Brain of pig, coated vesicles: purification and biochemical characterization, 93
BRIDGES, S. H. & FLEISCHMAN, J. B., The structure of an immunoglobin light chain fragment in mouse myeloma cells, 11
BROWN, J. C. (see also HUNT, R. C.), 413
BRUNORI, M. (see also BLUNDELL, T. L.), 665
BRYAN, W. P. (see also RAO, P. B.), 119
BUSCH, H. (see also OLSON, M. O. J.), 611

Calcium-binding protein from bovine intestine, preliminary crystallographic data, 661
Calorimetric investigation of $tRNA_1^{Val}$ melting, 279
CANTOR, C. R. (see also HUANG, K.-H.), 423, 443

Chan, R. K. (see also Kleckner, N.), 561
Chemotactic behavior of *Salmonella typhimurium*, evidence for an *S*-adenosylmethionine requirement, 207
Chemotaxis mutants of *Salmonella typhimurium*, isolation, characterization and complementation, 225
Chothia, C. & Leuzinger, W., Acetylcholinesterase: the structure of crystals of a globular form from electric eel, 55
Circular dichroism estimate of secondary structure of glutamate dehydrogenase, 391
Clegg, J. C. S. & Kennedy, S. I. T., Initiation of synthesis of the structural proteins of Semliki Forest virus, 401
Coated vesicles from pig brain: purification and biochemical characterization, 93
Coda, A. (see also Blundell, T. L.), 665
Conformational changes in proteins detected by antibodies as probes. A model study with the alkaline phosphatase of *Escherichia coli*, 309
— change of rabbit muscle aldolase in magnesium chloride and its relationship to the dissociation of subunits, 351
Co-operativity, negative, kinetic, absence in the allosteric model of Monod, Wyman and Changeux, 667
—, positive and negative, and half-of-the-sites reactivity in yeast and rabbit muscle glyceraldehyde 3-phosphate dehydrogenase, analysis of allosteric basis, 483
C-protein interaction with myosin, myosin rod and light meromyosin, 1
Crowther, R. A. (see also Jack, A.), 163
Crystals of two venom phospholipases A_2, characterization, 395
— structure of a globular form of acetylcholinesterase from electric eel, 55
Crystallization and preliminary X-ray diffraction studies on met-myoglobin from *Aplysia limacina*, 665
— mechanism of glutamic dehydrogenase, 127
— of the fungal enzyme proteinase K and amino acid composition, 267
Crystallographic data, preliminary, for a calcium-binding protein from bovine intestine, 661
Cummings, D. J. (see also Goddard, J. M.), 593
Curti, B. (see also Blundell, T. L.), 665

Dattagupta, J. K., Fujiwara, T., Grishin, E. V., Lindner, K., Manor, P. C., Pieniazek, N. J., Saenger, W. & Suck, D., Crystallization of the fungal enzyme proteinase K and amino acid composition, 267
Dehydrogenase for glyceraldehyde 3-phosphate, yeast and rabbit muscle, analysis of the allosteric basis for positive and negative co-operativity and half-of-the-sites reactivity, 483
—, glutamate, circular dichroism estimate of secondary structure, 391
—, glutamic, an analysis of the mechanism of crystallization, 127
Denhardt, D. T. (see also Lane, H. E. D.), 99
Dennis, P. P. & Nomura, M., Regulation of the expression of ribosomal protein genes in *Escherichia coli*, 61
Deoxyhaemoglobin, human, three-dimensional Fourier synthesis at 2·5 Å resolution: refinement of the atomic model, 237
DNA fragment of herpes simplex virus, presence in an L cell clone obtained after infection with irradiated herpes simplex virus 1, 533
—, mitochondrial, from *Paramecium aurelia*, structure and replication, 593
— of Simian virus 40, non-specific termination of replication, 113
— replication, bacteriophage λ: *in vivo* studies of the interaction between the viral *gamma* protein and the host *recBC* DNAase, 543
Deriel, J. K. (see also Paulus, H.), 667
Dichroism, circular, estimate of secondary structure of glutamate dehydrogenase, 391
Dinucleoside monophosphates, evidence for sequence preferences in the intercalative binding of ethidium bromide, 133
Drug-receptor interactions, quantitative aspects, 46
— -resistance element carrying an inverted repetition, mutagenesis by insertion, 561

Eel, electric, structure of crystals of a globular form of acetylcholinesterase, 55
Electric eel, structure of crystals of a globular form of acetylcholinesterase, 55

Electron microscopic determination of structure of tomato bushy stunt virus compared with that obtained by X-ray diffraction, 163
Electrophoresis, diagonal gel, used to identify nine neighboring protein pairs in the *Escherichia coli* 30 S ribosome crosslinked with methyl-4-mercaptobutyrimidate, 471
Endonuclease (*Bam*I), sequence-specific, isolated from *Bacillus amyloliquefaciens* H, 123
Energy transfer, singlet, studies of the arrangement of proteins in the 30 S *Escherichia coli* ribosome, 443
ENOKI, Y., TOMITA, S., OCHIAI, T. & IKAWA, Y., Increased resistance of mercury-coupled hemoglobins to alkali, 273
Erythrocyte plasma membranes, turkey, ligand specificity and characteristics of the β-adrenergic receptor, 35
Escherichia coli alkaline phosphatase used in model study of the use of antibodies as probes for detection of conformational changes in proteins, 309
— —, evidence for a positive regulation of RNA polymerase synthesis, 621
— —, regulation of the expression of ribosomal protein genes, 61
— — *rep* strains, slower movement of replication forks, 99
— — RNA polymerase, fidelity of transcription, 577
— — 30 S ribosome crosslinked with methyl-4-mercaptobutyrimidate, identification by diagonal gel electrophoresis of nine neighboring protein pairs, 471
— — 30 S ribosome reassembly studied using individual proteins labeled with an environmentally sensitive fluorescent probe, 423
— — 30 S ribosomes, singlet energy transfer studies of the arrangement of proteins, 443
Ethidium bromide, evidence for sequence preferences in its intercalative binding to dinucleoside monophosphates, 133
Expression regulation of ribosomal protein genes in *Escherichia coli*, 61
EZRAILSON, E. G. (see also OLSON, M. O. J.), 611

FAIRCLOUGH, R. H. (see also HUANG, K.-H.), 443
FELDMAN, D. (see also PASEK, M.), 395
FERMI, G., Three-dimensional Fourier synthesis of human deoxyhaemoglobin at 2·5 Å resolution: refinement of the atomic model, 237
FILIMONOV, V. V. (see also PRIVALOV, P. L.), 279
FLEISCHMAN, J. B. (see also BRIDGES, S. H.), 11
Fluorescent probe, environmentally sensitive, used to label individual proteins in studies of reassembly of 30 S *Escherichia coli* ribosomes, 423
Fourier synthesis, three-dimensional, of human deoxyhaemoglobin at 2·5 Å resolution: refinement of the atomic model, 237
FRANKLIN, R. M. (see also SCHÄFER, R.), 21
FRESCO, J. R. (see also KARPEL, R. L.), 519
Fringe relaxation procedure, modified, used in determination of absolute fringe number in low-speed equilibrium experiments, 202
FUJIWARA, T. (see also DATTAGUPTA, J. K.), 267
FULLMER, C. S. (see also MOFFAT, K.), 661
FUMAGALLI, M. (see also BLUNDELL, T. L.), 665
Fungal enzyme proteinase K, crystallization and amino acid composition, 267

GAGE, L. P. (see also KRAISELBURD, E.), 533
Gamma protein, viral, interaction with host *recBC* DNAase and the effect on replication of bacteriophage λ DNA *in vivo*, 543
Genes, ribosomal protein, in *Escherichia coli*, regulation of expression, 61
Glutamate dehydrogenase, circular dichroism estimate of secondary structure, 391
Glutamic dehydrogenase, an analysis of the mechanism of crystallization, 127
Glyceraldehyde 3-phosphate dehydrogenase, yeast and rabbit muscle, analysis of the allosteric basis for positive and negative co-operativity and half-of-the-sites reactivity, 483
GODDARD, J. M. & CUMMINGS, D. J., Structure and replication of mitochondrial DNA from *Paramecium aurelia*, 593

Mapping, physical, of temperature-sensitive mutations of adenoviruses, 369
Melting of $tRNA_1^{Val}$, a calorimetric investigation, 279
Membranes, turkey erythrocyte plasma, ligand specificity and characteristics of the β-adrenergic, receptor, 35
Mercury-coupled hemoglobins, increased resistance to alkali, 273
Meromyosin, light, myosin and myosin rod, interactions with C-protein, 1
Message and anti-message (genomic) RNA, covalently linked, from a defective vesicular stomatitis virus particle, 289
Metal complexes, cationic, stabilize native tertiary structure of yeast $tRNA_3^{Leu}$, 519
Methylation of mitochondrial rRNA, 339
Methyl-4-mercaptobutyrimidate crosslinked with *Escherichia coli* 30 S ribosome, identification by diagonal gel electrophoresis of nine neighboring protein pairs, 471
Met-myoglobin from *Aplysia limacina*, crystallization and preliminary X-ray diffraction studies, 665
Miller, N. S. (see also Karpel, R. L.), 519
Mitochondrial DNA from *Paramecium aurelia*, structure and replication, 593
— rRNA of yeast, minimal post-transcriptional modification, 337
Moffat, K., Fullmer, C. S. & Wasserman, R. H., Preliminary crystallographic data for a calcium binding protein from bovine intestine, 661
Molecular organization of the shell of the T_{even} bacteriophage head, 655
— weights of RNAs, determination by low-speed sedimentation equilibrium: 16 S ribosomal RNA as a model compound, 193
Monod, Wyman and Changeux allosteric model, absence of kinetic negative co-operativity, 667
Moos, C., Offer, G., Starr, R. & Bennett, P., Interaction of C-protein with myosin, myosin rod and light meromyosin, 1
Mouse, identification of a high molecular weight trans-membrane protein in L cells, 413
— myeloma cells, structure of an immunoglobulin light chain fragment, 11

Muscle aldolase of rabbit, subunit interactions. Conformational change of aldolase in magnesium chloride and its relationship to the dissociation of subunits, 351
—, rabbit, and yeast glyceraldehyde 3-phosphate dehydrogenase, analysis of the allosteric basis for positive and negative co-operativity and half-of-the-sites reactivity, 483
Mutagenesis by insertion of a drug-resistance element carrying an inverted repetition, 561
—, indirect, in phage lambda by ultraviolet preirradiation of host bacteria, 77
Mutants, chemotaxis, of *Salmonella typhimurium*, isolation, characterization and complementation, 225
Mutation, *rep*: slower movement of replication forks in *Escherichia coli rep* strains, 99
Mutations, temperature-sensitive, of adenoviruses, physical mapping, 369
Myeloma cells of mouse, structure of an immunoglobulin light chain fragment, 11
Myosin, myosin rod and light meromyosin, interactions with C-protein, 1
